Exam Code: 1Y0-800

Exam Name: Citrix EdgeSight 4.5: Admin, Perf, Mon,

&Load Testing

Vendor: Citrix

Version: DEMO

Part: A

1: Scenario: An administrator noticed a number of issues with one of the EdgeSight Agents. The agent device is slow and is not communicating with the server. It has multiple processes that are not responding and all of the RAM has been taken up. Of these symptoms, which one indicates that anti-virus is enabled?

A.The agent device is slow.

B.Multiple processes are not responding.

C.All the RAM on the agent has been taken up.

D.The agent is not communicating with the server.

Correct Answers: A

2: An administrator noticed a significant increase in the Thread Queue Length associated with the rscorsvc.exe and fbserver.exe processes on an EdgeSight Agent. What is the most probable reason for this significant increase?

A.The database is corrupted.

B.The processes are corrupted.

C.The anti-virus is not configured correctly.

D.The agent is not sending updates to the server.

Correct Answers: C

3: What does an administrator need to do in order to enable secure communications from EdgeSight Agents to server?

A.Select to enable SSL Support.

B.Select to disable SSL Support.

C.Install and configure third-party VPN.

D.Turn on the firewall on the agent device.

Correct Answers: A

4: Scenario: A company currently has EdgeSight 4.5 deployed with a dual-server configuration. One server hosts the Microsoft SQL database, the other is a web server hosting the remaining server-side components. In an effort to improve performance, the administrator decided to create a tri-server deployment model. Which two components can the administrator move onto the third server? (Choose two.)

A.Citrix License Server

B.Citrix EdgeSight Server Console

C.Microsoft Message Queuing (MSMQ)

D.Microsoft SQL Server Reporting Services

Correct Answers: A D

5: What is minimally required for the web server component of the EdgeSight Server?

A.Microsoft Message Queuing

B.Microsoft SQL Server Reporting Services 2000 Service Pack 1

C.Internet Information Services (IIS) 5.0 for Windows Server 2003

D.Microsoft SQL Server Service Pack 4 Standard Edition or greater

Correct Answers: A

6: Scenario: An administrator is designing a proof of concept (POC) for an EdgeSight 4.5 implementation. The company will allocate only the minimum number of servers necessary for the POC. The administrator has obtained license keys for the necessary software and wants to get the lab hardware operational as quickly as possible. What are the minimum number of EdgeSight servers needed for the project?

A.One

B.Two

C.Four

D.Three

Correct Answers: A

7: Which Microsoft software is required for the database component of the EdgeSight Server?

A.Message Queuing

B.SQL Client Add-on Tools

C.Windows Script 5.6 or higher

D..NET Framework version 2.0

E.SQL Server 2000 Service Pack 4 or greater

Correct Answers: E

8: An administrator is creating a new user account which Reporting Services will use to connect to the Report Server Database. Which two steps should the administrator complete when creating the new user account? (Choose two.)

A.Add the user account to a defined group.

B.Define security parameters for the user account.

C.Set a non-expiring password for the user account.

D.Grant the user account database access privileges.

Correct Answers: C D

9: After installing an EdgeSight Server, which two things must an administrator create to complete the appropriate post-installation configurations? (Choose two.)

A.Company

B.Department

C.Superuser account

D.Spectuser account

Correct Answers: A C

10: The spectuser account is a _____. (Choose the correct phrase to complete the sentence.)

A.Citrix EdgeSight Server user account that is used to communicate with the EdgeSight Agents

B.Microsoft SQL account that the EdgeSight Server uses to connect to its Microsoft SQL database

C.Microsoft SQL account that the EdgeSight Agent uses to connect to its Microsoft Access database

D.Citrix EdgeSight Agent user account that is used to communicate with Microsoft SQL Server Reporting Services

Correct Answers: B

11: Scenario: An administrator is going through the Post-Installation Wizard for an EdgeSight Server. The administrator decides that the EdgeSight Agent will be deployed to user devices in the company. Which option should the administrator select for the Server Mode to meet the needs of the scenario?

A.EndPoint Support Only

B.Server and EndPoint Support

C.Presentation Server Support Only

D.Presentation Server and EndPoint Support

Correct Answers: A

12: After an initial EdgeSight Agent installation, the administrator must _____. (Choose the correct phrase to complete the sentence.)

A.backup the EdgeSight database

B.restart the Citrix Licensing service

C.reboot the device onto which the EdgeSight Agent is installed

D.use the Citrix EdgeSight Post-Installation Setup Wizard to perform initial configurations

Correct Answers: C

13: An administrator is installing the EdgeSight for Presentation Server Agent in a multiple EdgeSight Server deployment. Which server name must the administrator specify in the EdgeSight for Presentation Server Agent Setup Wizard?

A.Web Server

B.Report Server

C.License Server

D.Database Server

Correct Answers: A

14: An administrator is installing and deploying an EdgeSight Agent and wants to specify custom install settings. Which two actions would allow the administrator to control the full range of installation options, including specifying a log file? (Choose two.)

A.Create a transform file.

B.Run the installer user interface.

C.Specify key/value pairs on the command line.

D.Create a customized MSI file from the Autorun Wizard.

Correct Answers: A C

15: Scenario: An administrator defines a hardware alert rule to monitor hardware changes in the environment. However, the administrator wants to ensure that data related to hardware changes that is not available through Windows Management Instrumentation is not collected. Which option and corresponding value must the administrator set when creating the agent configuration to meet

this requirement?

A.The Monitor PnP Devices value set to False

B.The Manage Data Collection value set to True

C.The Exclude Executable List value set to False

D.The Maintain Strict Privacy Policy value set to True

Correct Answers: A

16: An administrator needs to configure the agent to look for new alerts and/or new worker schedules more than once a day. Which worker configuration does the administrator need to configure to meet the requirements of the scenario?

A.Asset History

B.Configuration Check

C.Fault Report Cleanup

D.Database Maintenance

Correct Answers: B

17: Scenario: The administrator of a small financial institution, which has nearly 100 employees and operates between the hours of 9:00 am and 4:00 pm, configured a worker configuration for the EdgeSight for Presentation Server Agent. The administrator wants to make sure that the schedule does not interfere with client-side performance, but still runs consistently from day to day. The administrator now needs to configure a schedule that determines when the worker configuration should run.

Which schedule is the most appropriate for this scenario?

A.Once a day, with a start time of 3:00 am starting even if the device user is busy

B.Once a day, with a start time of 7:00 pm but delaying the start if the device user is busy

C.Multiple times a day, every eight hours between 4:00 pm and 9:00 am starting even if the device user is busy

D.Multiple times a day, every six hours between 9:00 am and 4:00 pm but delaying the start if the device user is busy

Correct Answers: A

18: In which two ways can sub-departments be created? (Choose two.)

A.Manually based on a Microsoft SQL query

B.Automatically as agents register with the server

C.Manually by users with administrative privileges

D.Automatically as the initial server configurations are enabled

Correct Answers: B C

19: Scenario: A department in an organization decided to change the scheduling of users and their tasks. This changed the peak resource utilization times for the client devices and Presentation Servers. The administrator wants to change the behavior of the EdgeSight Agent workers on the local client devices. Where should the administrator define a worker schedule?

A.On the EdgeSight Server

B.On the EdgeSight Agent registry

C.On the EdgeSight Configuration Server

D.On the EdgeSight Group Policy Configuration Object

Correct Answers: A

20: While attempting to move a department, an administrator receives an error message stating that it cannot be moved to the desired point in the tree. The administrator attempted to move the department to _____. (Choose the correct phrase to complete the sentence.)

A.an invalid bracketed selection

B.a sub-department of that department

C.the same point in the tree where it already was

D.a point in the tree where another department with the same name already exists

Correct Answers: D
