

Vendor: Novell

Exam Code: 050-895

Exam Name: CNI-Novell eDirectory Design and
Implementation: eDirectory 8.8

Version: DEMO

QUESTION 1

Determining the scope of the design process and creating a preliminary schedule occur during which phase of the eDirectory design cycle?

- A. Implementation phase
- B. Design phase
- C. Project approach phase
- D. Analysis of the current eDirectory design phase

Answer: C

QUESTION 2

When an LDAP client binds to Novell eDirectory as a [Public] User, what eDirectory right(s) does this user have by default?

- A. Browse and Compare
- B. Browse
- C. Browse, Read, and Compare
- D. Browse and Read
- E. Read and Compare

Answer: B

QUESTION 3

Why should the eDirectory database be partitioned and replicated? (Choose 2.)

- A. To provide fault tolerance for eDirectory
- B. To provide time synchronization
- C. To simplify administration of eDirectory security
- D. To provide more efficient access to eDirectory information
- E. To provide fault tolerance for the file system

Answer: AD

QUESTION 4

Which statement is true about eDirectory partitions?

- A. Partitions are logical divisions of eDirectory that enable the database to be divided among several servers.
- B. Partitions can overlap each other.
- C. A partition provides fault tolerance for the file system.
- D. A container object can reside in 2 partitions.

Answer: A

QUESTION 5

What are roles of the project manager when designing and implementing eDirectory? (Choose 2.)

- A. To maintain eDirectory design standards

- B. To identify training needs
- C. To determine hardware requirements
- D. To design Directory security
- E. To manage time estimates

Answer: BE

QUESTION 6

Which protocol allows users on TCP/IP networks to dynamically discover available network services?

- A. RIP
- B. SAP
- C. DHCP
- D. NTP
- E. SLP

Answer: E

QUESTION 7

What is the role of the server administrator when going through the eDirectory design and implementation process?

- A. To formulate a strategy for partition and replication
- B. To determine the use of single or multiple protocols on the network
- C. To design Directory security
- D. To plan server placement in the tree
- E. To identify training needs

Answer: D

QUESTION 8

Which is recommended when designing the upper layers of your eDirectory tree?

- A. Use a flat tree design.
- B. Minimize the number of login scripts.
- C. Create containers that reflect common employee access needs.
- D. Keep the eDirectory tree name short, descriptive, and unique.
- E. Avoid large container sizes.

Answer: D

Thank You for Trying Our Product

Lead2pass Certification Exam Features:

- ★ More than **99,900** Satisfied Customers Worldwide.
- ★ Average **99.9%** Success Rate.
- ★ **Free Update** to match latest and real exam scenarios.
- ★ **Instant Download** Access! No Setup required.
- ★ Questions & Answers are downloadable in **PDF** format and **VCE** test engine format.
- ★ Multi-Platform capabilities - **Windows, Laptop, Mac, Android, iPhone, iPod, iPad**.
- ★ **100%** Guaranteed Success or **100%** Money Back Guarantee.
- ★ **Fast**, helpful support **24x7**.
