HP Data Protector Software 6.1 introduces Change Log Provider (CLP) integration in addition to the existing Enhanced Incremental Volume Backup Disk Agent (EI VBDA). How do these two methods differ when performing incremental backups with millions of files and the file change rate is very low?

- A. CLP uses file tree walk to generate a list of objects to be backed up.
- B. EI VBDA functionality resolves these issues by reading a local database on the client system.
- C. EI VBDA helps incremental backups to complete in a much shorter amount of time.
- D. CLP significantly improves performance under these circumstances.

**Answer: D**

## Thank You for Trying Our Product

### Lead2pass Certification Exam Features:

- ★ More than **99,900** Satisfied Customers Worldwide.
- ★ Average **99.9%** Success Rate.
- ★ **Free Update** to match latest and real exam scenarios.
- ★ **Instant Download** Access! No Setup required.
- ★ Questions & Answers are downloadable in **PDF** format and **VCE** test engine format.
- ★ Multi-Platform capabilities - **Windows, Laptop, Mac, Android, iPhone, iPod, iPad**.
- ★ **100%** Guaranteed Success or **100%** Money Back Guarantee.
- ★ **Fast**, helpful support **24x7**.
