Vendor: EMC

Exam Code: E20-805

Exam Name: EMC Storage and Information Infrastructure Expert Exam for Technology Architects

Version: DEMO

QUESTION 1
The Security Operations team would like a way to quickly mitigate security vulnerabilities that are reported by networking equipment vendors.
Which solution should be used to identify hospital equipment that is affected by these vulnerabilities?

A. EMC Ionix Network Configuration Manager Network Advisor
B. EMC Ionix Network Configuration Manager Report Advisor
C. RSA enVision
D. Application Discovery Manager

Answer: A

QUESTION 2
The Chief Security Officer must provide proof on a quarterly basis that device configurations have not deviated from the gold standard configurations approved by the hospital's Change Advisory Board.
What is the best way to prepare this documentation?

A. EMC Ionix Network Configuration Manager Report Advisor
B. EMC Ionix Network Configuration Manager Network Advisor
C. RSA enVision
D. Application Discovery Manager

Answer: A

QUESTION 3
The Chief Security Officer has mandated that the credentials for all of the networking equipment must be changed quarterly. There can be no mistakes in timing or deploying these new credentials, and there can be no downtime.
What is the best solution available to accomplish this mandate?

A. EMC Ionix Network Configuration Manager
B. EMC Ionix Network Configuration Manager Network Advisor
C. EMC Ionix IT Operations Service Assurance Manager
D. EMC Ionix Application Discovery Manager

Answer: A

QUESTION 4
The customer is concerned that the backup to tapes for offsite storage may not meet the current SLA. Which Celerra feature provides the fastest backup solution that meets their SLA?

A. Celerra NDMP backup to disk, then offload to tape
B. Celerra LAN backup to disk, then offload to tape
C. Celerra Replicator
D. Celerra SnapSure

Answer: A

QUESTION 5
The customer wishes to store sensitive corporate documents that must be retained for seven years due to regulatory requirements. Even the file system administrators must not be able to destroy file systems. And the contents must be protected under all circumstances.
Which solution would meet this requirement?

A. File Level Retention? Compliance
B. File Level Retention? Enterprise
C. Centera
D. Celerra Replicator

Answer: A

QUESTION 6
The customer asks you which changes must be made to the Active Directory to support this new reporting infrastructure. How should you respond?

A. Celerra integrates with Active Directory; no changes are necessary.
B. Backup privileges must be added to the web writer group.
C. New users must be added to the web writer group.
D. Provide administrator privileges to all users of the network-attached storage (NAS).

Answer: A

QUESTION 7
The customer anticipates increasing their user base and throughput requirements by a factor of 3x to 5x. Which Celerra feature can be leveraged to meet this anticipated growth?

A. Interface trunking
B. MPFS-enabled file systems
C. N+1 standby availability
D. Failsafe networking

Answer: A

QUESTION 8
Which aspect of Celerra helps to improve availability?

A. Hardware clustering
B. Multiple network interface cards (NICs) to support trunking
C. Simplified disaster recovery
D. MPFS-enabled file systems

Answer: A

QUESTION 9
What is an advantage that the Celerra Antivirus solution provides to this customer over a traditional Windows server?

A. Scanning servers can be set up for various antivirus products.
B. Different antivirus products can be installed on different Data Movers.
C. Data stored on a Celerra is not affected by Windows viruses so it does not need to be scanned.
D. Executables cannot run on a Data Mover so there is no need for virus scanning.

Answer: A

QUESTION 10
Which potential features in the new virtual infrastructure would provide the last three benefits
listed in this scenario?

A. Fault tolerance and EMC PowerPath/VE
B. Fault tolerance and VMware NMP
C. High availability and Storage VMotion
D. High availability and VMotion

Answer: A
