Exam Name: ISTQB Certified Tester Advanced Level - Test Analyst

Version: DEMO

QUESTION 1
Which of the following is NOT an example of a typical pre-condition for test execution?

A. A properly configured test environment
B. Thoroughly specified test procedures
C. A process for managing identified defects
D. Defined level of requirements coverage achieved

Answer: D

QUESTION 2
Defects are discovered through test analysis and design because...

A. the testers' mindset is focused on finding defects
B. developers are involved in writing test cases
C. the cost of fixing a defect will increase if found later on
D. the author of the test basis will have made errors

Answer: D

QUESTION 3
Scenario "Incident management"
A test team is keeping logs of the incidents that they observe. They use a commonly-available word processor to write the incident reports in individual files, which are held in shared storage. They track the incidents, along with some incident details, in a spreadsheet.
You have now also been given the task to identify the key fields for logging the incident reports. So far the following fields have been in use in the Excel sheet:

```
- Incident description
- Date
- Author
- Version of the software under test
```

Which of the following would you recommend as the most important field to add?

A. Priority
B. Incident identification
C. Developer assigned to the fix
D. Date to be fixed

Answer: A

QUESTION 4
Scenario "Incident management"
A test team is keeping logs of the incidents that they observe. They use a commonly-available word processor to write the incident reports in individual files, which are held in shared storage. They track the incidents, along with some incident details, in a spreadsheet.
Identify THREE main advantages of this approach to incident management.

A. Quick to set up and cheap
B. Electronic rather than manual

C. Allows co-operation of various locations
D. Can be easily integrated with other tools, such as configuration management tools and test execution tools
E. Large files are not a problem
F. High level of usability
G. Easy to document screen shots and have attachments to the spreadsheet

Answer: ABF

QUESTION 6
It has been suggested to organise a performance test to investigate the third type of complaint. Which of the following could be used to quantify the situation?

A. Time needed for defect analysis
B. Number of errors made by the user
C. Mean Time To Repair (MTTR)
D. Time required by the user to perform the function

Answer: D

QUESTION 7
