

Vendor: Juniper

Exam Code: JN0-141

Exam Name: Juniper Networks Certified Associate, UAC
(JNCIA-AC)

Version: DEMO

QUESTION 1

Which three statements are true about Host Checker? (Choose three.)

- A. Host Checker can collect information for use with MAC authentication.
- B. Host Checker can modify a role assignment immediately if a policy fails.
- C. Host Checker can be invoked before a user is allowed to sign in to the Infranet Controller.
- D. The Host Checker Integrity Measurement Verifier (IMV) works only with Odyssey Access Client.
- E. The Host Checker Integrity Measurement Collector (IMC) can run on Windows, Mac, and Linux systems.

Answer: B C E

QUESTION 2

Which statement is accurate about the integrated Odyssey Access Client agent?

- A. The agent is installed by the Layer 2 enforcer.
- B. The agent is installed by the overlay enforcer.
- C. The agent is installed by the Infranet Controller.
- D. The agent communicates with the overlay enforcer in agentless mode.

Answer: C

QUESTION 3

What are two elements of Juniper Networks Access Management Framework? (Choose two.)

- A. user account
- B. sign-in policy
- C. role access policy
- D. authentication realm

Answer: B D

QUESTION 4

Which three devices are elements described in the 802.1X specification? (Choose three.)

- A. supplicant
- B. access point
- C. authenticator
- D. endpoint client
- E. authentication server

Answer: A C E

QUESTION 5

Which two actions are required to configure an overlay enforcer to communicate with an Infranet Controller? (Choose two.)

- A. Enable SSH.
- B. Configure DNS.

- C. Enable route mode.
- D. Set certificate validation options.

Answer: A D

QUESTION 6

What happens when Host Checker is configured to perform checks every "0" minutes?

- A. Host Checker is disabled.
- B. Host Checker performs continuous checks.
- C. Host Checker performs checks only when the user first logs in.
- D. Host Checker performs checks when the user attempts to access a resource.

Answer: C

QUESTION 7

What is the primary purpose of creating a location group?

- A. to associate more than one realm with an authentication server
- B. to logically group network access devices and associate them with specific sign-in policies
- C. to allow or prevent users from accessing resources in specific locations on the network
- D. to define the URL that users of network access devices can use to access the Infranet Controller

Answer: B

QUESTION 8

If you include the domain administrator name and password when defining an AD/NT authentication server, what does this allow you to do?

- A. Allows the user to change their password on the AD/NT authentication server.
- B. Allows the Infranet Controller to change its password on the AD/NT authentication server.
- C. Allows the user to query the AD/NT authentication for user information for role mapping purposes.
- D. Allows the Infranet Controller to query the AD/NT authentication server for group information for role mapping purposes.

Answer: D

QUESTION 9

One of your users cannot access a protected resource. When you examine the output of debug auth infranet on the overlay enforcer, you see the following output:

```
## 2008-07-10 21:01:06 : notify drop: 10.4.2.5
## 2008-07-10 21:01:20 : update_jps_a_b: auth_id 3, src_ip 10.4.2.5, user bob ## 2008-07-10
21:01:20 : : roles 1213902732.796213.0, role-names Employee , user ctx ,idle_timeout 0
## 2008-07-10 21:01:20 : AUTHID: 1 NOT FOUND
```

What can you deduce from this output?

- A. The end user has not authenticated to the Infranet Controller.
- B. The Infranet Controller has not relayed the resource access policy to the enforcer.
- C. The Infranet Controller has not relayed the user authentication data to the enforcer.

- D. The end user has not been assigned the role associated with the resource access policy protecting the resource.

Answer: C

QUESTION 10

What are two ScreenOS commands you can run on the overlay enforcer to troubleshoot communication with the Infranet Controller? (Choose two.)

- A. get event
- B. get controller status
- C. get auth table infranet
- D. exec infranet controller connect

Answer: A D

Thank You for Trying Our Product

Lead2pass Certification Exam Features:

- ★ More than **99,900** Satisfied Customers Worldwide.
- ★ Average **99.9%** Success Rate.
- ★ **Free Update** to match latest and real exam scenarios.
- ★ **Instant Download** Access! No Setup required.
- ★ Questions & Answers are downloadable in **PDF** format and **VCE** test engine format.
- ★ Multi-Platform capabilities - **Windows, Laptop, Mac, Android, iPhone, iPod, iPad**.
- ★ **100%** Guaranteed Success or **100%** Money Back Guarantee.
- ★ **Fast**, helpful support **24x7**.
