Case Study: 1 - Tailspin Toys (QUESTION 73 - QUESTION 83)

Case Study: 2 - World Wide Importers (QUESTION 84 - QUESTION 90)

Case Study: 3 - Baldwin Museum of Science (QUESTION 91 - QUESTION 98)

Case Study: 4 - Proseware, Inc (QUESTION 99 - QUESTION 108)

Case Study: 5 - Contoso Ltd (QUESTION 109 - QUESTION 118)

QUESTION 1

You are implementing a claims-based authentication solution for a SharePoint farm in an Active Directory Domain Services domain. You install and configure Active Directory Federation Services (AD FS). You need to ensure that all web applications in the farm support SAML-based claims authentication. What should you do? (Each correct answer presents part of the solution. Choose all that apply.)

- A. Configure AD FS with the web application as a relying party.
- B. Configure web applications to use forms-based authentication and AD FS as the trusted identity provider.
- C. Configure web applications to use claims-based authentication and AD FS as the trusted identity provider.
- D. Configure web applications to use classic mode authentication and AD FS as the trusted identity provider.
- E. Configure SharePoint to trust AD FS as an identity provider.CA

Answer: ACE

Explanation:

Configure SAML-based claims authentication with AD FS in SharePoint 2013. This configuration has the following phases that must be performed in consecutive order:

Phase 1: Install and configure an AD FS server

(A)

Phase 2: Configure AD FS with the web application as a relying party (E)

Phase 3: Configure SharePoint 2013 to trust AD FS as an identity provider (C)

Phase 4: Configure web applications to use claims-based authentication and AD FS as the trusted identity provider

Reference: Configure SAML-based claims authentication with AD FS in SharePoint 2013

QUESTION 2

Drag and Drop Question

You are a SharePoint architect for Contoso, Ltd. Contoso has a SharePoint 2010 farm that contains four site collections. Three site collections are available only inside the company network. The fourth site collection is available to an external partner company by using forms-based authentication. The external site collection is used to store contracts and purchase orders. Every site collection has its own content database.

Contoso purchases an Office 365 subscription for external partner employees.

Contoso plans to move the external site collection to SharePoint Online.

You have the following requirements:

- Upgrade the external partner site collection to SharePoint Online.
- Upgrade the on-premises farm to SharePoint 2013.

- Minimize downtime for the upgrade.
- Ensure the sites are read-only during the upgrade.

You need to plan the upgrade for the extranet site.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

- Update DNS.
- Create a site collection that allows external sharing for authenticated users by using the SharePoint admin center.
- Mount the content database and upgrade the site collections to SharePoint 2013 mode.
- Build a new SharePoint 2013 farm with required Service Applications.
- Copy and attach content databases to SQL Server.
- In the SharePoint 2010 farm, set the site collections to read-only from the Site Collection Quota and Locks page in Central Administration.
- Export contracts and purchase orders by using the Explorer view. Use the OneDrive for Business Sync client to sync files to the external partner site in SharePoint Online.

Answer Area

Answer:

Actions

- Update DNS.
- Create a site collection that allows external sharing for authenticated users by using the SharePoint admin center.
- Mount the content database and upgrade the site collections to SharePoint 2013 mode.
- Build a new SharePoint 2013 farm with required Service Applications.
- Copy and attach content databases to SQL Server.
- In the SharePoint 2010 farm, set the site collections to read-only from the Site Collection Quota and Locks page in Central Administration.
- Export contracts and purchase orders by using the Explorer view. Use the OneDrive for Business Sync client to sync files to the external partner site in SharePoint Online.

Answer Area

Copy and attach content databases to SQL Server.

Mount the content database and upgrade the site collections to SharePoint 2013 mode.

Update DNS.

QUESTION 3

Drag and Drop Question

You administer a SharePoint 2013 farm for Contoso, Ltd.

Company policy requires that minimal permissions are granted to users to perform their tasks.

You need to add User1 as Full Control on the User Profile Service Application.

How should you complete the relevant Windows PowerShell commands? To answer, select the appropriate Windows PowerShell segment from each list in the answer area.

Answer Area

\$HRUser = "contoso\user1"

\$UPA = "User Profile Service Application"

\$UPAapp = Get-SPServiceApplication -Name \$UPA

\$principal =  **\$HRUser -IdentityType** 

\$security =  **\$UPAapp -Admin**

Grant-SPObjecSecurity \$security \$principal 

 **\$UPAapp \$security -Admin**

Answer:

Answer Area

`$HRUser = "contoso\user1"`

`$UPA = "User Profile Service Application"`

`$UPAapp = Get-SPServiceApplication -Name $UPA`

`$principal =`  `$HRUser -IdentityType` 

`$security =`  `$UPAapp -Admin`

`Grant-SPOBJECTSecurity $security $principal` 

`$UPAapp $security -Admin` 

QUESTION 4

You recently upgraded a SharePoint Server 2007 server farm to SharePoint Server 2013. You discover that when search results contain Microsoft Word 2007 documents, the results do not display the title of the documents. Instead, the results display a few words from the text of the documents as the title.

You need to ensure that the title of the Word 2007 documents is displayed in the search results. The solution must minimize administrative effort.

What should you do?

- A. Modify the EnableOptimisticTitleOverride registry value.
- B. Modify the DisableLoopbackCheck registry value.
- C. Delete and recreate the Search Service Application.
- D. Reset the index and perform a full crawl.

Answer: D

Explanation:

You must create a new managed property and map only TermTitle and Title crawled properties. Then do another full crawl.

Incorrect:

Not A: This only works in SharePoint 2010.

7aa21099886f/is-there-a-way-to-force-search-results-to-display-word-document-titles?forum=sharepointsearch

QUESTION 5

An organization upgrades a SharePoint 2010 environment to SharePoint 2013. A site collection is running in SharePoint 2010 compatibility mode. You must verify that the following features will function correctly when the site collection is upgraded to SharePoint 2013 native mode:

- List views
- Custom web parts
- Content query web parts
- Subsites

You need to ensure that you can perform verification testing without impacting the current user experience. What should you do?

- A. Upgrade the site collection to SharePoint 2013.
- B. Perform a database attach upgrade.
- C. Enable the Visual Upgrade option for the site collection.
- D. Generate an upgrade evaluation site collection.

Answer: D

QUESTION 6

You are the administrator for your company's SharePoint environment.

You are configuring a site collection to prepare for an upgrade to SharePoint Server 2013.

You need to ensure that no updates are allowed to an individual site collection.

What should you do?

- A. In Central Administration, set the state of the site lock status to Adding Content prevented.
- B. In Central Administration, set the state of the site lock status to Read-only.
- C. In Central Administration, set the state of the site lock status to No access.
- D. In SQL Server, set the content database to read-only.

Answer: A

Explanation:

Option Adding Content prevented prevents users from adding new content to the site collection.

Updates and deletions are still allowed.

QUESTION 7

Hotspot Question

You are managing search results in a SharePoint farm.

You need to promote or demote search results that include specific tags.

In the Search service application, what should you configure? (To answer, select the appropriate link in the answer area.)

QUESTION 8

A company has an Active Directory Domain Services domain that contains a SharePoint farm. The farm contains a site collection that displays data from an employee information database. You define a domain user account named HRUsers and configure the account to have read-only permissions to the database.

You have the following data access requirements for the employee information database:

- Members of the Human Resources department must be able to view data by using SharePoint, without entering database credentials.
- No other SharePoint users should be able to view the employee data.

You need to meet the requirements. Which two actions should you perform? (Each correct answer presents part of the solution. Choose two.)

- A. Enable the Reports and Data Search Support site collection feature.
- B. Create an external list that displays data from the employee information database.
- C. In the Secure Store service application, define a target application by using a group mapping.
- D. Enable site collection reporting.
- E. In the Secure Store service application, define a target application by using an individual mapping.

Answer: AC

Explanation:

C (not E) The Secure Store Service is designed to create a background mapping between a group of users in SharePoint, and a single user known to the external data system.

QUESTION 9

You are configuring a SharePoint environment to support workflows.

Workflows must meet the following requirements:

- Display a visual representation of the workflow.
- Display the workflow history.
- Provide access to external lists.

You need to implement the necessary shared services. Which shared services should you implement? (Each correct answer presents part of the solution. Choose two.)

- A. Business Data Connectivity Services
- B. Workflow Services
- C. Access Services
- D. Word Automation Services
- E. Visio Graphics Services

Answer: BE

Explanation:

B: SharePoint Server 2013 can use a new workflow service built on the Windows Workflow Foundation components of the .NET Framework 4.5. This new service is called Workflow Manager and it is designed to play a central role in the enterprise.

Processes are central to any organization and workflow is the orchestrator of processes.

E: SharePoint Designer 2013 includes new functionality designed specifically for Workflow Manager. In SharePoint Designer 2013 this new platform is known as the SharePoint 2013 Workflow platform.

These new features include:

A visual workflow development experience that uses a Visio 2013 add-in

QUESTION 10

A Sales team creates proposals by using Microsoft Word. Sales team members store and review the proposal documents in the Sales team site collection. New proposals are uploaded to the team site for approval. You need to ensure that approved proposals are automatically converted to PDF format and then routed to a records center site collection. Which two features should you implement? (Each correct answer presents part of the solution. Choose two.)

- A. Send To Connections
- B. Content deployment
- C. Document Conversion Service
- D. Machine Translation Service
- E. Word Automation Services

Answer: AC

Explanation:

A: A connection is a path used for sending documents to a document center or a records center. The connection specifies the web application that documents will be sent from, the document center or records center that they will be sent to, and certain aspects of how the documents are sent. A records center is a site that is designed for records management. Connections are created by a farm administrator in SharePoint 2013. The farm administrator configures the connection to copy content, to move content, or to move the content and leave a link in the source site collection.

C: Document Conversion Service enables automatic conversion from Word to PDF.

Incorrect:

Not D: Machine translation services is used to translate text from one language to another.

QUESTION 11

A company has two SharePoint farms as described in the following table.

Name	URL
HRFarm	https://hrweb.tailspintoys.com
FinanceFarm	https://finweb.tailspintoys.com

You need to process incoming server requests on HRFarm that originate from FinanceFarm. What should you do? (Each correct answer presents part of the solution. Choose all that apply.)

- A. Configure both farms to use Secure Sockets Layer (SSL) connections.
- B. Run the Windows PowerShell cmdlet New-SPTTrustedSecurityTokenIssuer on a server in FinanceFarm.
- C. Run the Windows PowerShell cmdlet New-SPTTrustedSecurityTokenIssuer on a server in HRFarm.
- D. Log on as a member of the Administrators group on a server in HRFarm.
- E. Run the Windows PowerShell cmdlet Get-SPTTrustedSecurityTokenIssuer -Identity FarmA on a server in HRFarm.

Answer: ACD

Explanation:

C (not B):

New-SPTTrustedSecurityTokenIssuer

Creates a trust between a server to server principal. Use the New-SPTTrustedSecurityTokenIssuer cmdlet to establish a trust between a server to server principal.
