QUESTION 1

A network administrator has installed IMC and the appropriate licenses. The network administrator is attempting to import the HP Comware and HP Provision switches into IMC but is experiencing problems importing the Comware switches. The network administrator verifies the SNMPv2c configuration on both sets of switches and the SNMP configuration in IMC. The SNMP parameters are correct.

What is the cause of the import problem?

- A. Comware switches are not fully supported by IMC.
- B. Comware switches implement SNMPv3 by default.
- C. Comware switches require SSH to be configured for remote CLI access.
- D. Comware switches do not have telnet fully configured.

Answer: B
