Exam Name: Managing Citrix XenDesktop 7 Solutions

Version: DEMO

Added 6 New Simulations + 2 Drag and Drop Questions

QUESTION 1
Based on the information shown in the attached exhibit, does the XenServer host have sufficient CPU resources available?

Click the Exhibit button to view a screenshot of the Performance Graphs for the XenServer host.

A. The CPU resources are sufficient, and NO upgrade is required.
B. The CPU resources are sufficient, but some virtual machines have occasional peaks.
C. The CPU resources are insufficient; upgrading or running fewer virtual machines is recommended.
D. The CPU resources are sufficient for now, but running additional virtual machines is NOT recommended.

Answer: A

QUESTION 2
A Citrix Administrator turned on Provisioning Services auditing. Changes made in the _____, _____ and _____ will be recorded. (Choose the three correct locations to complete the sentence.)

A. MCLI
B. SOAP Server
C. Provisioning Services Console
D. Provisioning Services BOOTPTAB Editor
E. Provisioning Services Boot Device Manager

Answer: ABC

QUESTION 3
Drag and Drop Question
In what order are profile management configuration methods processed?
Place the profile management configuration methods in the order in which they are processed from highest precedence to lowest precedence.

Create a bond	
Settings in the profile definition applied to the Delivery Group that contains the Machine	
Citrix Profile Manager .INI file	
Group Policy	
XenDesktop Policies in the HDX Policy node	

Answer:

| Create a bond	Create a bond
Settings in the profile definition applied to the Delivery Group that contains the Machine	Group Policy
Citrix Profile Manager .INI file	Settings in the profile definition applied to the Delivery Group that contains the Machine
Group Policy	Citrix Profile Manager .INI file
XenDesktop Policies in the HDX Policy node	XenDesktop Policies in the HDX Policy node

QUESTION 4
Simulation

Scenario:
A Citrix Administrator has prepared two server OS machines to host applications.
The administrator used Machine Creation Services to provision the server OS machines.
The server OS machines are part of the Windows 2012 Servers machine catalog.
The Server 2012 Hosted Desktops and Applications delivery group is assigned to the Windows 2012 Servers machine catalog. The administrator was instructed to roll out Firefox as a hosted

application and has installed Firefox on the master server OS machine named Win2012-Master. Now,the administrator needsto update the server OS machines so that Firefox is available as a hosted application to only the Finance user group through StoreFront or Citrix Receiver upon the next reboot of the server OS machines. The Finance user group is a member of the Server 2012 Hosted Desktops and Applications delivery group.

Tasks:
Update the Windows 2012 Servers machine catalog to meet the requirements outlined in the scenario.
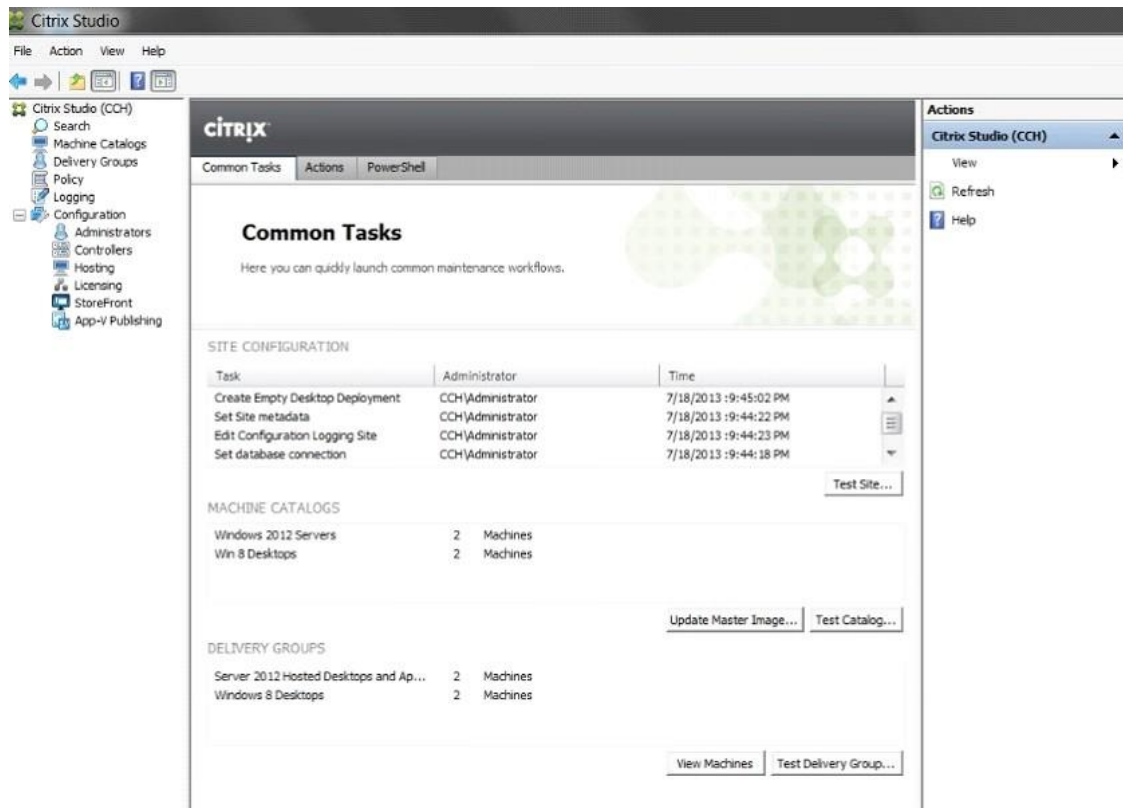

Answer:

In Studio, select the **Machine Catalogs** node and then click **View**.
Select the machine catalog to upgrade. Check the Details tab, which displays operating system and VDA version information and click **Upgrade Catalog**.
The wizard checks to make sure that the machine catalog can be upgraded and indicates that the machine catalog is suitable for upgrade.
If the wizard indicates that the machine catalog is suitable for upgrade, an informational message appears. Click **Upgrade** and follow the prompts to complete the upgrade.
If one or more machines are not suitable, the wizard lists the reasons for the machine deficiencies.
Click **View Details** for detailed information. You can optionally export the information to a file by clicking **Export Details** in the Upgrade Warnings dialog box.
Click **Cancel** and update the machines that need upgrades.
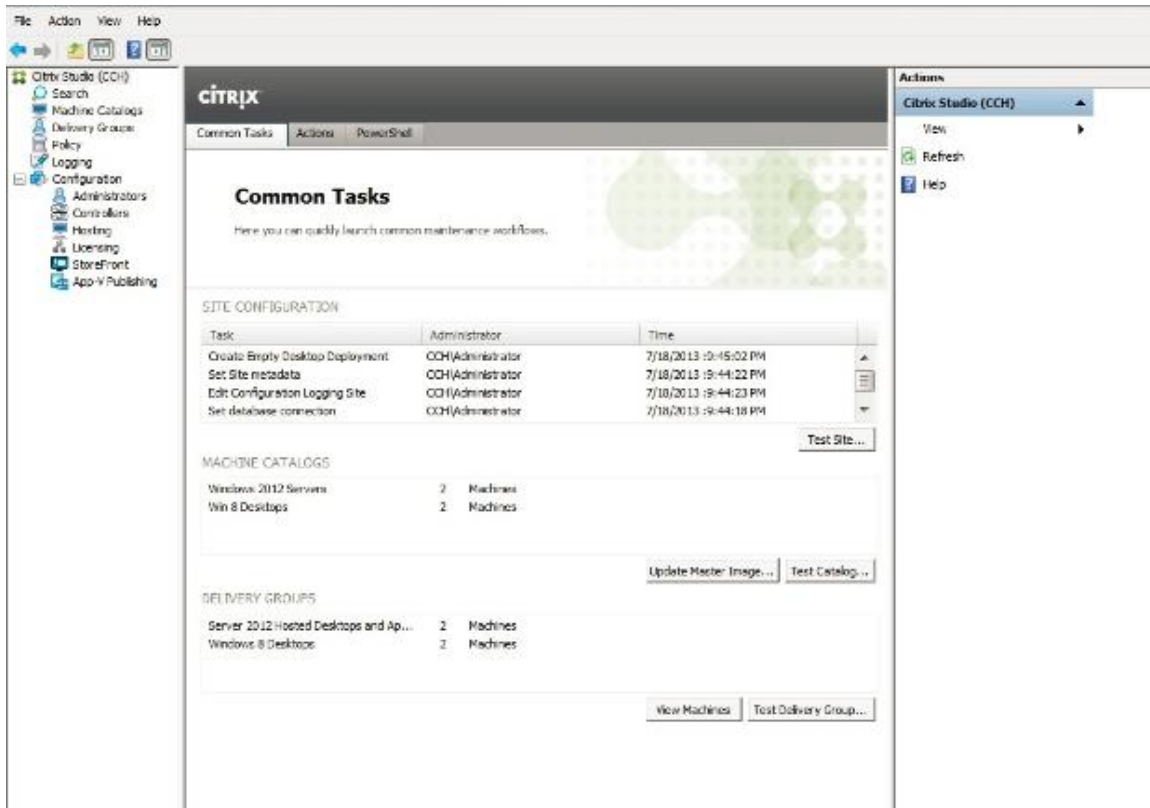

To create an application for a Delivery Group
In Studio, select the **Delivery Group** node, select the **Applications** tab, and then click **Create Applications**.
On the Delivery Group page, select a Delivery Group to host the applications and then click **Next**.
On the **Applications** page, add existing applications to this Delivery Group from the list of applications Studio discovers and displays.

Note: The assigned user or group must be a member of the Delivery Group to which this application is assigned to view or access this application.
To optionally add a custom application, click **Add applications manually** then click **Next**.
Complete the following information about the application on the Add an Application
Manually page:
Path to the executable file
Optional command line parameters
Directory
Display names for administrator and users - Name that users see and Name that only administrators see
Location - Path to the application's executable file, working directory, and an optional command line argument
Limit Visibility - Limit which users or groups of users can see the application

Note: The assigned user or group must be a member of the Delivery Group to which this application is assigned. Otherwise, they cannot view or access this application.
File Type Association - Which types of files the application automatically opens
On the Summary page, check all details
Repeat the previous steps to create applications for additional application Delivery Groups or application and desktop Delivery Groups.
QUESTION 5

After configuring Active Directory authentication on a NetScaler VPX appliance, users report that they are unable to authenticate to NetScaler. Which two steps must a Citrix Administrator complete to troubleshoot this issue? (Choose two.)

A. Validate that port 389 is open to the domain controller.
B. Enable AAA authentication logging to monitor user authentication attempts.
C. Run the LDAP browser from the Delivery Controller to validate LDAP connectivity.
D. Configure a session policy on the NetScaler virtual server to use the LDAP profile.

Answer: AB

QUESTION 6

A Citrix Administrator needs to shadow a user session from Citrix Director but is unable to connect to the user's Windows 7 virtual desktop.
Which two ports may be blocked by a firewall? (Choose two.)

A. 80
B. 135
C. 443
D. 1494
E. 3389

Answer: BE

QUESTION 7
A Citrix Administrator identifies that Citrix Studio CANNOT communicate with the Delivery Controller database. Which port may be blocked, preventing Citrix Studio from being able to connect to the database?

A. 443
B. 1433
C. 1494
D. 27000

Answer: B

QUESTION 8
Which three 60-minute historical trends can a Citrix Administrator view when using Citrix Director? (Choose three.)

A. CPU usage
B. Machine failures
C. License checkouts
D. Connection failures
E. Concurrent sessions
F. Memory consumption

Answer: BDE

QUESTION 9
Scenario: A Citrix Administrator replaces the production StoreFront server with a new StoreFront server. Users access their resources from StoreFront through NetScaler. Which NetScaler policy must the administrator modify in order to allow users to continue to access resources securely from external locations?

A. Traffic
B. Session
C. Authorization
D. Authentication

Answer: B

QUESTION 10
The Sales team requests that a Citrix Administrator enhance the user experience on tablet devices. Which policy setting should the administrator enable to meet the requirements of the Sales team?

A. Multimedia Conferencing
B. Flash Content Redirection
C. Windows Media Redirection
D. Launch touch-optimized desktop

Answer: D

QUESTION 11
A Citrix Administrator needs to ensure that individual support teams are only able to control the delivery groups for their units. Which feature should the administrator configure to ensure that the appropriate teams have administrator access to the desktops for their particular unit?

A. Scopes
B. Exclusion filters
C. User assignment
D. SmartAccess settings

Answer: A

QUESTION 12
Which two actions should a Citrix Administrator take prior to deleting desktop OS machines from a machine catalog? (Choose two.)

A. Turn off the desktop OS machines.
B. Place the desktop OS machines in maintenance mode.
C. Remove the desktop OS machines from the hypervisor.
D. Delete the Active Directory account for the desktop OS machines.
E. Enable maintenance mode on the hypervisor hosting the desktop OS machines.

Answer: AB

QUESTION 13
Which two methods could a Citrix Administrator use to ensure that users are able to launch multiple virtual desktop sessions? (Choose two.)

A. Change the 'Desktops per user' setting in the delivery groups settings.
B. Give the user multiple devices so that they can have a session open on each.
C. Create two host connections from the Delivery Controller to different hypervisors.
D. Create two delivery groups from the same catalog and assign the users to both delivery groups.

Answer: AD

QUESTION 14
A Citrix Administrator publishes an application but receives reports that the application is NOT visible in Receiver through StoreFront. Why is the application NOT visible to users?

A. The application is disabled.
B. The path to the executable is incorrect.
C. There are some user groups NOT assigned to the application.
D. There are NO available server OS machines in the machine catalog.

Answer: C
