

Vendor: HP

Exam Code: HP0-J40

Exam Name: Designing HP StorageWorks Solutions

Version: DEMO

QUESTION 1
When talking to a CEO about service availability, which feature of HP Storage Essentials SRM should be positioned by the consultant?

A. SRM solutions are designed on the SMI-S industry standard for storage network management.
B. Big-picture view monitors and reports on a variety of business applications.
C. Big-picture visualization automatically discovers and maps the storage network.
D. SRM monitors utilization of the host, switch, and array.

Answer: B

QUESTION 2
A potential customer is experiencing massive data growth in the past year and is no longer meeting their backup window. The customer's current environment consists of approximately 30 ProLiant servers utilizing Backup Exec and a SCSI attached LTO2 autoloader.
After a number of meetings, the consultant presents the design of a D2D4112, an MSL8096 with HP Data Protector. The customer likes the solution, but is concerned about how their staff will cope with the new concepts and the transition to the new solution. What should the consultant recommend to the customer for a smooth transition to the new equipment? (Select two.)

A. hands-on training during implementation
B. handover session after the installation
C. formal classroom training on the new products
D. as-built configuration documentation
E. solution presentation

Answer: AC

QUESTION 3
for application disaster recovery, which type of local replication permits rapid recovery of applications?

A. capacity free snapshot
B. snapclone
C. consistency group snap
D. traditional snapshot

Answer: B

QUESTION 4
A customer has Microsoft clusters presenting multiple TB of data as file services. The customer is looking for a technology approach to simplify the data lifecycle management of that large amount of data.
Which HP Storage Essentials SRM tool would help the customer to quickly identify disk space that can be recycled, pinpoint critical files that should be replicated, and more accurately implement Information Management initiatives?

A. Backup Manager
B. NAS Manager
C. File System Viewer

D. Provisioning Manager

Answer: C

QUESTION 5
Which encryption type is used for securing data in transit over IP networks?

A. Advanced Encryption Standard
B. Internet protocol security
