

**Exam Code:** HP0-821

**Exam Name:** HP Data Protector Software Applicatn  
Integratn-Windows/UNIX

**Vendor:** HP

**Version:** DEMO

## Part: A

1: Click the Task button.

Associate the common database components with the correct description by dragging and dropping the boxes.

Click the Exhibit button for instructions on how to complete drag and drop items.

Associate the common database components with the correct description by dragging and dropping the boxes.

Component	Description
(place here)	used to recover the database and return it to a consistent state
(place here)	the physical files used to store the data
(place here)	information about the physical structure of the database
(place here)	holds the most often used pages of the data files

### Components to Select

Database Cache	Control Files	Transaction Logs	Data Files
----------------	---------------	------------------	------------

### Correct Answers:

Associate the common database components with the correct description by dragging and dropping the boxes.

Component	Description
Transaction Logs	used to recover the database and return it to a consistent state
Data Files	the physical files used to store the data
Control Files	information about the physical structure of the database
Database Cache	holds the most often used pages of the data files

### Components to Select

Database Cache	Control Files	Transaction Logs	Data Files
----------------	---------------	------------------	------------

2: Which database integration uses the Virtual Device Interface (VDI) to allow faster backups and

restores in HP Data Protector Software?

- A.Oracle
- B.Sybase
- C.SAP R/3
- D.Microsoft SQL Server

**Correct Answers: D**

3: Which pre-configuration task is required to perform a file system backup of a database?

- A.installation of an online integration
- B.execution of a shut-down script
- C.setting the database to archive mode
- D.installation of a Media Agent on the database

**Correct Answers: B**

4: What are functions of the omnisap.exe program in SAP R/3 integrations with HP Data Protector Software? (Select two.)

- A.starts the SAP R/3 backup utilities
- B.configures the SAP R/3 integration
- C.controls backup or restore streams
- D.exports appropriate environment variables
- Ecreates the omnisap share on the SAP/R3 server

**Correct Answers: A D**

5: What can you use to back up the SAP/R3 binaries for disaster recovery in an HP Data Protector Software integration with an Oracle database?

- A.RMAN
- B.SAP/R3 SAPDR tool
- C.SAP/R3 BRBACKUP utility
- D.HP Data Protector Software UMA

**Correct Answers: C**

6: Why should you have a copy of the database control files?

- A.They contain the database file structure.
- B.They contain the database access information.
- C.They enable automatic recovery of the database.
- D.They enable you to access the archived database log files.

**Correct Answers: A**

7: Click the Task button.

Identify the steps involved in the standard flow of transaction processing for a common database and arrange them in the correct sequence by dragging and dropping the boxes.

Click the Exhibit button for instructions on how to complete drag and drop items.

Identify the steps involved in the standard flow of transaction processing for a common database and arrange them in the correct sequence by dragging and dropping the boxes.

**Step    Operation**

1	(place step here)
2	(place step here)
3	(place step here)

**Operations to Select**

- The transaction logs are rolled forward.
- A transaction is recorded into the transaction log.
- The transaction logs are rolled back.
- From time to time sets of modified pages are flushed to data files on disk.
- Changes required in the transaction are applied to cached pages.

**Correct Answers:**

Identify the steps involved in the standard flow of transaction processing for a common database and arrange them in the correct sequence by dragging and dropping the boxes.

Step	Operation
1	A transaction is recorded into the transaction log.
2	Changes required in the transaction are applied to cached pages.
3	From time to time sets of modified pages are flushed to data files on disk.

**Operations to Select**

- The transaction logs are rolled forward.
- A transaction is recorded into the transaction log.
- The transaction logs are rolled back.
- From time to time sets of modified pages are flushed to data files on disk.
- Changes required in the transaction are applied to cached pages.

8: How can you improve the reliability of backed up data?

- A. Use a minimum concurrency of 2 for the backup.
- B. Enable the log all option for the datalist configuration.
- C. Use Third Mirror Break Off technology for the backup.
- D. Enable cyclic redundancy check on the backup device.

**Correct Answers: D**

9: What must you install to use controller replication in HP Data Protector Software (for example, in the EVA)?

- A. omnisnapvol utility on the agent system
- B. SMI-S integration on the HP Data Protector Software server
- C. a Fibre Channel HBA and API on the HP Data Protector Software server
- D. appropriate storage management software on the HP Data Protector Software server

**Correct Answers: B**

10: How can you back up the init.ora and password files of an Oracle database in an HP Data Protector Software integration?

- A. Run a database full backup.
- B. Back up the current control file.

C.Perform an RMAN online backup.

D.Perform an HP Data Protector Software filesystem backup.

**Correct Answers: D**
