- B. Substitution, supplemental, and response
- C. HTTP response header, redirection, and directory
- D. Substitution, redirection, and HTTP response headers

Answer: D

QUESTION 4

While creating Internet Site documents, you do not select a specific server from your environment to host the Web site. What is the result of this action?

- A. All servers in the domain may host this site.
- B. The Internet Site will not be loaded on any server.
- C. All servers with no default Internet Site specified will serve this site.
- D. Any server with the same organizational certifier may serve the Web site.

Answer: B

QUESTION 5

When the LDAP service cannot find information for which an LDAP client is searching, it can return a referral to the client. What Domino service does it utilize to provide this referral?

- A. MAPS

- B. Referrer
- C. Replicator
- D. Directory Assistance

Answer: D

QUESTION 6

You have created substitution rules on your Domino Web server. However, you failed to include at least one wildcard anywhere in the rule. What is the result of this action?

- A. Domino will send the user to the default home page for the Web server.
- B. The Domino Web server will ignore the request from the browser session.
- C. The user will receive an error code defined by the administrator in this rule.
- D. The HTTP task automatically appends "/" to the pattern when it stores the rule in its internal table.

Answer: D

QUESTION 7

Marshall, the Domino administrator, has enabled multi-server session authentication (MSSO), but it is not functioning properly. Which of the following is necessary for him to complete for SSO to be enabled properly?

- A. Create a Web SSO Configuration document.
- B. Remove the HTTP task from the server notes.ini file.
- C. Remove the full DNS server name in the host name field of the Web Site or Server document.
- D. Choose Disabled in the Web Site document to prevent cookies from being used by the Domino server for authentication.

Answer: A

QUESTION 8

Domino allows you to move files from one directory to another on the same Web server. What type of rule should be created so new links do not need to be created?

- A. Direction Rule
- B. Directory Rule
- C. Redirection Rule
- D. Substitution Rule

Answer: D

QUESTION 9
