

**Vendor:** IBM

**Exam Code:** C2170-010

**Exam Name:** IBM Cúram V6.0.4, Development

**Version:** DEMO

### QUESTION 1

When customizing a Codetable (CTX) file in Cúram, which of the following statements are true?

- A. To add a new entry to a code table, create a new CTX file in the custom directory with the same name as the existing CTX and add the new entry
- B. To change an entry in a code table, copy the existing file to the appropriate custom directory, append custom\_ to the code name, and insert the new code value
- C. To remove an entry from a code table, copy the existing file to the appropriate custom directory and remove the entry in question
- D. To change an entry in a code table, create a new CTX file in the custom directory with the same name as the existing CTX, copy the code table item from the existing CTX, and make any required changes to the copy
- E. Custom codes are appended to the end of the corresponding, existing code table

**Answer:** AD

### QUESTION 2

Which of the following are fundamental data types in the Cúram model?

- A. SVR\_MONEY
- B. SVR\_LONG
- C. SVR\_DATE
- D. SVR\_CODE
- E. SVR\_BOOLEAN

**Answer:** ACE

### QUESTION 3

Which of the following statements about SQL host variables in Cúram are true? Which of the following statements about SQL host variables in Cúram are true?

- A. All parameter host variables must be included in the argument struct.
- B. All host variables must be prefixed by a colon.
- C. All return host variables must be included in the return struct.
- D. Host variables are not case sensitive.
- E. In custom entity SQL, each host variable should consist of the data type plus variable name.

**Answer:** ABC

### QUESTION 4

Which of the following statements about aggregation in Cúram are correct? Which of the following statements about aggregation in Cúram are correct?

- A. An entity may aggregate another entity.
- B. A struct may aggregate an entity.
- C. A struct may aggregate another struct.
- D. An entity may aggregate a struct.

**Answer:** BC

#### QUESTION 5

From the DefaultAppSection.sec file presented here, which of the following statements is valid?

```
<?xml version="1.0" encoding="ISO-8859-1"?>
<sc:section
  xmlns:sc="http://www.curamssoftware.com/curam/util/client/section-config"
  id="DefaultAppSection" title="DefaultAppSection.title">

  <sc:tab id="AccountHome" >
    <sc:shortcut-panel-ref id="AccountSectionShortcuts" />
  </sc:tab>

  <sc:tab id="OrganizationHome" />

  <sc:tab id="AccountHome" />

  <sc:shortcut-panel-ref id="DefaultSectionShortcuts" />

</sc:section>
```

- A. When this section is rendered in the browser, the AccountSectionShortcuts panel will be rendered if the user visits the AccountHome tab
- B. Configuring two distinct Tab elements, both referencing AccountHome, allows Cúram to display two different account details in separate tabs at the same time
- C. This configuration will be loaded to the database without error, but an error will occur at runtime
- D. At build time an error will occur preventing the configuration from being loaded

**Answer:** D

#### QUESTION 6

Which two of the following are valid options for model-specified validations? [Select 2]

- A. Maximum\_Value
- B. Maximum\_Chars
- C. Minimum\_Size
- D. Starts\_With
- E. Ends\_With

**Answer:** AC

#### QUESTION 7

Which two of the following statements about the CONNECT element are true? [Select 2]

- A. When used inside a LIST, a CONNECT element can have a TARGET element as a child element
- B. When used inside a FIELD, a CONNECT element must have at least one SOURCE, TARGET, or INITIAL as a child element
- C. The CONNECT element can be used to indicate which SERVER\_INTERFACE is related to which ACTION\_CONTROL
- D. The CONNECT element can have multiple TARGET elements
- E. The CONNECT element is a valid child of the PAGE element

**Answer:** BE

**QUESTION 8**

In which of the following files would a developer define the database name for his/her curam application?

- A. datamanager\_config.xml
- B. Application.prx
- C. Bootstrap.properties
- D. ApplicationConfiguration.properties

**Answer:** C

**QUESTION 9**

For which two of the following customizations is it compliant to subclass an entity? [Select 2]

- A. Add a new attribute
- B. Override an attribute
- C. Override a database operation
- D. Override a non-database (<<blank>>) operation
- E. Enable an exit point for an operation

**Answer:** DE

**QUESTION 10**

Which of the following statements about handcrafted service layer classes is true?

- A. Google Guice dispatches events to listeners
- B. The Persistence Infrastructure (PI) Adapter is used to translate high-level data requests to entity operations
- C. The Entity Interface provides search (read-multi) operations
- D. Entity classes are not modeled, as they are provided by the Entity Interface

**Answer:** B

**QUESTION 11**

Which of the following represents the correct approach for customizing curam-config.xml compliantly?

- A. Create a file ending in config.xml in the custom folder containing the changes
- B. Create a file ending in -config.xml in the custom folder containing the changes
- C. Create a file ending in Config.xml in the custom folder containing the changes
- D. Change curam-config.xml in place

**Answer:** B

## Thank You for Trying Our Product

### Lead2pass Certification Exam Features:

- ★ More than **99,900** Satisfied Customers Worldwide.
- ★ Average **99.9%** Success Rate.
- ★ **Free Update** to match latest and real exam scenarios.
- ★ **Instant Download** Access! No Setup required.
- ★ Questions & Answers are downloadable in **PDF** format and **VCE** test engine format.
- ★ Multi-Platform capabilities - **Windows, Laptop, Mac, Android, iPhone, iPod, iPad**.
- ★ **100%** Guaranteed Success or **100%** Money Back Guarantee.
- ★ **Fast**, helpful support **24x7**.
