

Vendor: Hitachi

Exam Code: HH0-350

Exam Name: HDS Certified Specialist - NAS Architect

Version: DEMO

QUESTION 1

Your customer wants to issue administrative commands to a Hitachi NAS Platform 4000 over their data network using scripting.

What must you do?

- A. Change the firewall setting in SMU to allow access to the admin EVS.
- B. Assign an IP address to the admin EVS on the data network aggregate.
- C. Run the scripted commands against any existing file services EVS.
- D. Add an additional IP address to the file services EVS used by the clients.

Answer: B

QUESTION 2

Which document must be completed in the pre-sales cycle before scheduling professional services resources for a customer installation?

- A. Site Implementation Guide
- B. Systems Readiness Document
- C. Pre-Engagement Checklist
- D. Change Control Approval Form

Answer: C

QUESTION 3

You are designing a solution for a customer who has the following requirements for their NAS environment:

- Synchronous replication for all their filesystems
- Automated failover
- Stretched cluster at a distance of 50 km

Which solution should you recommend?

- A. File Replication
- B. SyncDR
- C. Hitachi Universal Replicator
- D. Object Replication

Answer: B

QUESTION 4

A customer has configured two LAGs on their Hitachi NAS Platform 3090 cluster. EVS A uses ag1 and EVS B uses ag2.

What will cause EVS A to failover?

- A. The SMU quorum service is stopped,
- B. All the EVSB file systems go offline.
- C. All the GbE ports go offline from ag1.
- D. The cluster interconnect goes offline.

Answer: C

QUESTION 5

You are working on a proposal for a VMware customer which includes a Hitachi NAS Platform 4000 in a two-node cluster with a single HUS 150 system attached.

What are two best practices when architecting the solution? (Choose two.)

- A. HDP should not be used with TFS.
- B. Configure RAID-6 fortier0.
- C. Dedicate HDP pools solely to the HNAS system.
- D. Maintain a ratio of 1 or 2 HDP volumes for each RAID group that is used in the DP pool.

Answer: CD

QUESTION 6

You are designing a solution for a Hitachi NAS Platform 4000 that will be used in a VMware vSphere environment. The customer would like to use tiering to improve performance.

What are three design best practices for Hitachi Tiered File Systems in this environment? (Choose three.)

- A. When using SAS drives in tier 0, RAID 1+0 should be used.
- B. RAID6 should be configured for HDT.
- C. SSD should be used in tier 0 to achieve the largest performance improvements.
- D. Use the "fs-analyze-data-usage" command to simulate Tiered File System metadata requirements.
- E. Use five percent of the total file system size to estimate the metadata requirements.

Answer: ACE

QUESTION 7

A customer wants to use XVL for data tiering on their Hitachi NAS Platform 4000.

Which three protocols are supported? (Choose three.)

- A. CIFS
- B. NFS
- C. HTTP
- D. FCP
- E. HTTPS

Answer: BCE

Thank You for Trying Our Product

Lead2pass Certification Exam Features:

- ★ More than **99,900** Satisfied Customers Worldwide.
- ★ Average **99.9%** Success Rate.
- ★ **Free Update** to match latest and real exam scenarios.
- ★ **Instant Download** Access! No Setup required.
- ★ Questions & Answers are downloadable in **PDF** format and **VCE** test engine format.
- ★ Multi-Platform capabilities - **Windows, Laptop, Mac, Android, iPhone, iPod, iPad**.
- ★ **100%** Guaranteed Success or **100%** Money Back Guarantee.
- ★ **Fast**, helpful support **24x7**.
