Exam Code: E22-250

Exam Name: Ionix for IT Operations Intelligence Exam

Version: DEMO

QUESTION 1
A switch appears down in Service Assurance Manager. After trying to troubleshoot the problem, an operator finds out that the switch has been removed from service. Why didn't this switch automatically become Unmanaged in Smarts?

A. IP Availability Manager needs to be restarted to remove this switch.
B. Other devices that were connected to this switch are still reachable by Smarts.
C. This switch requires rediscovery.
D. Unmanaging devices is a manual process.

Answer: D

QUESTION 2
You want to enhance your existing AM Domain Manager by adding Smarts IP Performance monitoring to your installation. You are running Service Assurance Manager version 7.1.0. What should you do to be sure the upgraded AM is sending the correct information to SAM?

A. Ensure that the Domain Type for the Domain Manager has been changed to INCHARGE-AM-PM-SUITE
B. Launch performance reporting to see if performance data gathering is working
C. Make sure SAM has been restarted after installing the new IP Performance license
D. Verify your IP Domain Manager has been renamed to include "PM"

Answer: A

QUESTION 3
The network administrator asked that all remote branch access routers be polled more often to get more granular measurement of performance metrics. What needs to be done?

A. Copy the existing Router Polling group and split the members between the two groups
B. Create a new Polling group for the branch office routers with a shorter polling interval
C. Create a new Threshold group and set the Polling setting in the Threshold Window to a lower value
D. Reduce the Threshold to accommodate the new requirement

Answer: B
