Vendor: VMware

Exam Code: 5V0-21.20

Exam Name: VMware HCI Master Specialist

Version: DEMO

QUESTION 1
Which two are requirements for Kubernetes cluster virtual machines when leveraging vSphere Cloud Native Storage (CNS)? (Choose two.)

A. set the disk.EnableUUID advanced setting to TRUE
B. Set the Disk Mode to Independent
C. virtual machine hardware version 15 or higher
D. configure UEFI firmware
E. minimum of 4 vCPUs per node

Answer: AD

QUESTION 2
An administrator has been tasked with the shutdown process of one of the nodes in a 4-node vSAN Cluster, in order to replace a motherboard. The administrator must select the correct maintenance mode option to ensure all objects remain compliant with the vSAN Default Storage Policy. No changes have been made to this policy.
Which maintenance mode option should the administrator select?

A. Allow Reduced Redundancy
B. Ensure Accessibility
C. No Data Migration
D. Full Data Migration

Answer: C

QUESTION 3
The vSAN Health Check 'Hosts disconnected from vCenter Server' is reporting an error state for one host in the vSAN Cluster. All other health checks in the Network category are in a green state. Which VMware recommended remediation task should be taken by the administrator?

A. Configure a vSAN-enabled VMkernel port on the affected host.
B. Restart the vSAN Management Daemon.
C. Right-click the affected host and click Remove from Inventory.
D. Right-click the affected host and click Connection > Connect.

Answer: B

QUESTION 4
An administrator observes a significant amount of vSAN backend traffic at the cluster level. What are two possible causes? (Choose two.)

A. vSAN Stretched Cluster storage policy was assigned to virtual machines in a vSAN standard cluster,
B. The host is rebuilding vSAN logs in the cache tier after a reboot.
C. The migration of virtual machines to the vSAN datastore using Storage vMotion is occurring.
D. The host entered maintenance mode with no data migration.
E. vSAN is performing data resynchronizations after a host failure.

Answer: CE

QUESTION 5
What is the key factor when sizing the Witness Host for a vSAN Stretched Cluster?

A. size of the cache tier within the witness appliance
B. size of the ESXi boot drive to account for metadata
C. number of maximum components supported
D. number of vCPUs within the Witness appliance

Answer: D

QUESTION 6
Which two statements regarding networking are true for a vSAN Stretched Cluster? (Choose two.)

A. The vSAN data network must communicate with the vSAN witness host.
B. A Stretched Layer 2 network is required at the vSAN data sites and at the witness site.
C. A Stretched Cluster can use Layer 2 or Layer 3 communication for the vSAN network.
D. a 5ms RTT or less is required between the data sites.
E. PIM is required for stretched vSAN clusters.

Answer: BD

QUESTION 7
Reference the chart. An IT team is required to size a 4-Node Hybrid vSAN cluster. Four possible configurations have been proposed to meet the requirement of failure to tolerate of one

Option A	Option B	Option C	Option D
• Cache: 1 x 400GB NVMe • Capacity: 4 x 3.84TB SAS	• Cache: 2 x 400GB • Capacity: 4 x 2.4TB SAS	• Cache: 1 x 400GB NVMe • Capacity: 6 x 2.4TB SAS	• Cache: 3 x 400GB • Capacity: 6 x 2.4TB SAS

Each disk group has its own controller.
Which node configuration provides the highest level of resilience?

A. Option D
B. Option A
C. Option B
D. Option C

Answer: A

Thank You for Trying Our Product

Lead2pass Certification Exam Features:

★ More than **99,900** Satisfied Customers Worldwide.

★ Average **99.9%** Success Rate.

★ **Free Update** to match latest and real exam scenarios.

★ **Instant Download** Access! No Setup required.

★ Questions & Answers are downloadable in **PDF** format and **VCE** test engine format.

★ Multi-Platform capabilities - **Windows, Laptop, Mac, Android, iPhone, iPod, iPad**.

★ **100%** Guaranteed Success or **100%** Money Back Guarantee.

★ **Fast**, helpful support **24x7**.
