SAP

C_HCMOD_02 Exam

Certified Application Associate - SAP HANA Cloud Modeling

Question: 1

What can you do with shared hierarchies? Note:There are 2 correct answers to this question.

A. Access hierarchies created in external schemas
B. Enable SQL SELECT statements to access hierarchies
C. Provide reusable hierarchies for drilldown in a CUBE with star join
D. Provide reusable hierarchies for drilldown in a CUBE without star join

Answer: B D

Question: 2

Why would you create SQL in calculation views?

A. To implement custom logic
B. To provide an alternative to graphical modeling
C. To fine-tune performance
D. To enable write capabilities

Answer: A

Question: 3

Which type of join supports a temporal condition in a calculation view?

A. Referential join
B. Inner join
C. Text join
D. Left outer join

Answer: B

Question: 4
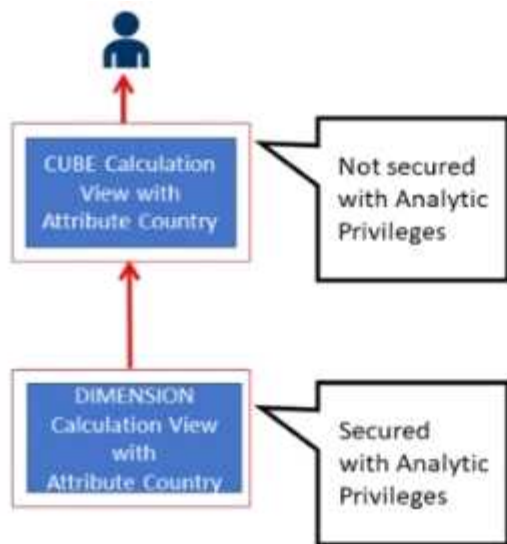

Referring to the diagram,

which privileges would a user require to view United States data when querying the CUBE calculation view?

A. A SELECT privilege on the CUBE calculation view and an Analytic Privilege (Country = United States) on the DIMENSION calculation view
B. A SELECT privilege and an Analytic Privilege (Country = United States) on the DIMENSION calculation view
C. A SELECT privilege and an Analytic Privilege (Country = United States) on the CUBE calculation view
D. SELECT privileges and Analytic Privileges (Country = United States) on both views

Answer: A

Question: 5

What options do you have to handle orphan nodes in your hierarchy?Note: There are 2 correct answers to this question.

A. Define an expression to determine a parent.
B. Generate additional root nodes.
C. Assign them to a level below the root.
D. Assign them to a node at the root level.

Answer: B C
