Vendor: Fortinet

Exam Code: FCSS_SASE_AD-25

Exam Name: FCSS - FortiSASE 25 Administrator

Version: DEMO

QUESTION 1
An administrator must restrict endpoints from certain countries from connecting to FortiSASE.

Which configuration can achieve this?

A. Configure a network lockdown policy on the endpoint profiles.
B. Configure a geography address object as the source for a deny policy.
C. Configure geofencing to restrict access from the required countries.
D. Configure source IP anchoring to restrict access from the specified countries.

Answer: C
Explanation:
Geofencing allows the administrator to restrict or allow access to FortiSASE services based on the geographic location of the endpoints, effectively blocking connections from specified countries.

QUESTION 2
What is the benefit of SD-WAN on-ramp deployment with FortiSASE?

A. To provide access to private applications using the bookmark portal
B. To provide device compliance checks using ZTNA tags
C. To secure internet traffic for branch users
D. To manage branch location endpoints

Answer: C
Explanation:
SD-WAN on-ramp with FortiSASE directs branch user internet traffic to the FortiSASE cloud for consistent security enforcement and protection, regardless of the branch location.

QUESTION 3
Which two settings are automatically pushed from FortiSASE to FortiClient in a new FortiSASE deployment with default settings? (Choose two.)

A. zero trust network access (ZTNA) tags
B. tunnel profile
C. FortiSASE certificate authority (CA) certificate
D. real-time protection

Answer: BC
Explanation:
In a default FortiSASE deployment, the tunnel profile (for secure connectivity) and the FortiSASE CA certificate (for SSL inspection and trusted communication) are automatically pushed to FortiClient endpoints.

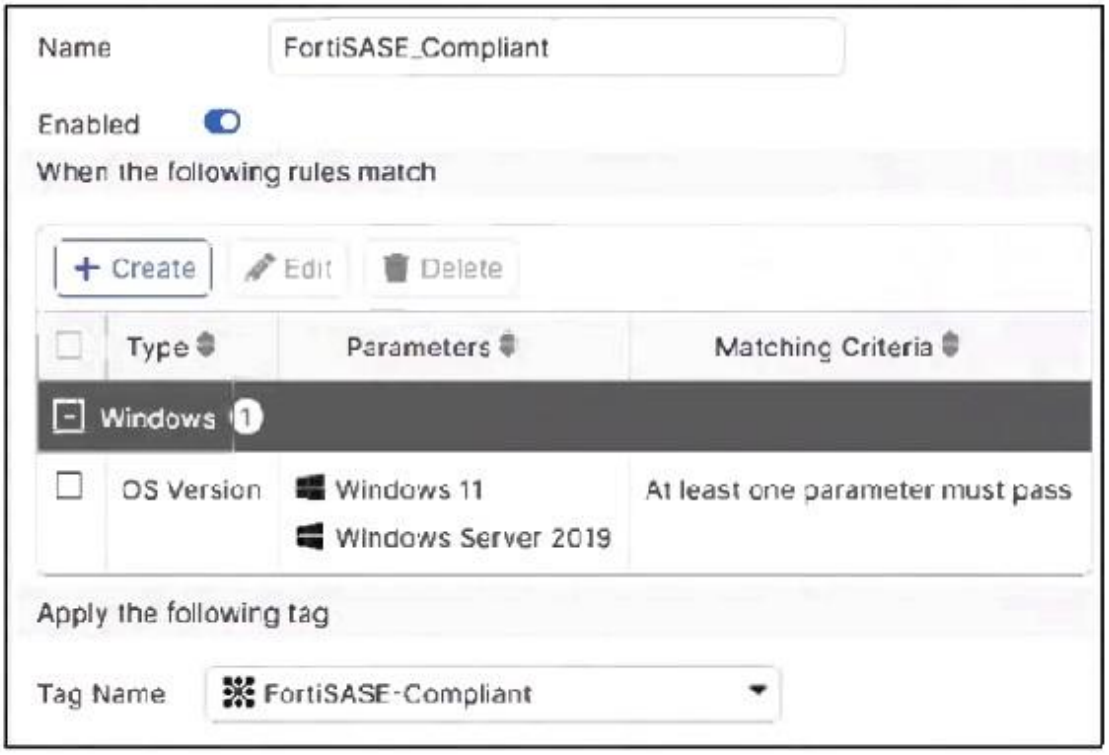
QUESTION 4
Refer to the exhibits. Jumpbox and Windows-AD are endpoints from the same remote location. Jumpbox can access the internet through FortiSASE, while Windows-AD can no longer access the internet.

Based on the information in the exhibits, which reason explains the outage on Windows-AD?

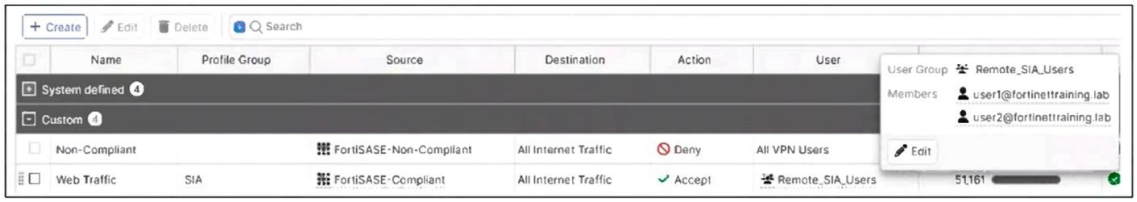
Managed Endpoints

Endpoint	ZTNA Tags (Detailed)	Management Connection	Software OS	FortiClient Versi
Jumpbox	FortiSASE-Compliant	Online	Microsoft Windows 11 Professional Edition, 64-bit (build 26100)	7.2.8.1140
Windows-AD	FortiSASE-Compliant FortiSASE-Non-Compliant	Online	Microsoft Windows Server 2019 Datacenter Edition, 64-bit (build 17763)	7.2.6.1076

ZTNA Tagging Rules



Secure Internet Access Policy



A. Windows-AD is excluded from FortiSASE management.
B. The FortiClient version installed on Windows AD does not match the expected version on FortiSASE.
C. The device posture for Windows-AD has changed.
D. The remote VPN user on Windows-AD no longer matches any VPN policy.

Answer: C
Explanation:
The Windows-AD endpoint now has both "FortiSASE-Compliant" and "FortiSASE-Non-Compliant" tags due to failing the antivirus software check. As a result, the Secure Internet Access Policy matches the "Non-Compliant" rule, which is set to Deny, causing the device to lose internet access.

QUESTION 5
Which description of the FortiSASE inline-CASB component is true?

A. It has limited visibility when data is transmitted.
B. It detects data in motion.
C. It is placed outside the traffic path.
D. It relies on API to integrate with cloud services.

Answer: B
Explanation:
FortiSASE inline-CASB operates in the traffic path to provide real-time visibility and control over data in motion as it is transmitted to and from cloud applications.

QUESTION 6
Which authentication method overrides any other previously configured user authentication on FortiSASE?

A. MFA
B. Local
C. RADIUS
D. SSO

Answer: D
Explanation:
Single Sign-On (SSO) overrides any other previously configured user authentication method on FortiSASE, taking precedence for user authentication.

QUESTION 7

What are two advantages of using zero-trust tags? (Choose two.)

A. Zero-trust tags can determine the security posture of an endpoint.
B. Zero-trust tags can be assigned to endpoint profiles based on user groups.
C. Zero-trust tags can be used to allow or deny access to network resources.
D. Zero-trust tags can help monitor endpoint system resource usage.

Answer: AC
Explanation:
Zero-trust tags assess endpoint compliance based on defined posture rules and are used in access policies to control whether a device is permitted or denied access to specific network resources.

QUESTION 8
Which FortiSASE feature ensures least-privileged user access to corporate applications that are protected by an on-premises FortiGate device?

A. secure web gateway (SWG)
B. zero trust network access (ZTNA)
C. cloud access security broker (CASB)
D. remote browser isolation (RBI)

Answer: B
Explanation:
ZTNA enforces least-privileged access by verifying user identity and device posture before granting access to specific corporate applications, even when protected by an on-premises FortiGate.

QUESTION 9
A company must provide access to a web server through FortiSASE secure private access for contractors.

What is the recommended method to provide access?

A. Configure a TCP access proxy forwarding rule and push it to the contractor FortiClient endpoint.
B. Update the DNS records on the endpoint to access private applications.
C. Publish the web server URL on a bookmark portal and share it with contractors.
D. Update the PAC file with the web server URL and share it with contractors.

Answer: C
Explanation:
The bookmark portal is the recommended method for providing contractors access to private web applications through FortiSASE Secure Private Access, as it offers a user-friendly, secure, and controlled access mechanism without requiring full network connectivity.

Thank You for Trying Our Product

Lead2pass Certification Exam Features:

★ More than **99,900** Satisfied Customers Worldwide.

★ Average **99.9%** Success Rate.

★ **Free Update** to match latest and real exam scenarios.

★ **Instant Download** Access! No Setup required.

★ Questions & Answers are downloadable in **PDF** format and **VCE** test engine format.

★ Multi-Platform capabilities - **Windows, Laptop, Mac, Android, iPhone, iPod, iPad**.

★ **100%** Guaranteed Success or **100%** Money Back Guarantee.

★ **Fast**, helpful support **24x7**.
